The image contains a hand-drawn diagram with mathematical expressions. The text appears to be related to some form of algorithm or process, involving variables and operations. The notation includes functions and possibly recursive processes, with variables like Q, f(Q), and T(Q) highlighted.
\[ \begin{align*}
m & \geq \min \left\{ \frac{3}{20}, 6 \right\} \\
TC(m) & = \frac{101.3}{m}
\end{align*} \]

if \( \frac{3}{20} < 6 \) then,
\[ m = \frac{3}{20} \]
else \[ m = 6 \]

\[ \begin{align*}
L & = \frac{1}{6} m \\
TC & = 5 \cdot \frac{3}{20} m + 10 \cdot \frac{1}{6} m
\end{align*} \]
Can zero L yadon vac to
unshn... glacial L

\[ Q(L) = L \]

\[ TC(Q) = wQ^2 \]

Ch. 6: Cellular Glasse

AP - \( \frac{Q}{L} \)

100 vs. 1/100

1 vs. 1/100 0.05

5 vs. 1/0.05 50
\[ 5x^2 \quad \text{equals} \quad 3x \]

\[ L = 5x^2 \quad y = 3x \]

\[ TC(x) = 500x^2 + 25 \]

\[ L = 5x^2 \quad y = 3x \]

5x^2 = 3x
